## CATEGORY: Security

Kwikset®, a division of Black & Decker Hardware and Home Improvement Group, has recently been recognized by *Multi-Housing News* readers as a 2008 Technology Choice Award winner. The company received this honor in the security category, which is a testament to our strong commitment to bring door hardware innovation and technology to the multifamily housing market.

### **New SmartKey™ Features Advanced Re-Key Technology for Increased Convenience and Control**

SmartKey's groundbreaking lock technology provides multifamily contractors, remodelers and building

managers the ability to re-key the lock in less than 30 seconds without removing it from the door, eliminating the hassle and cost of replacing the lock. With SmartKey, in three simple steps, a potentially compromised or outdated key can be replaced with a new, secure key.

### **SmartKey's Patented Side Locking Bar Technology Provides Superior Security**

SmartKey brings a higher level of security to residential door hardware through its patented side locking-bar technology. Because SmartKey eliminates the typical sheer line found in traditional pin and tumbler locks,

SmartKey locks are both bump and pick resistant. By using the included proprietary SmartKey Learn Tool and the existing functioning key, builders and property managers can safely and easily change or swap out keys. By requiring both the functioning key and the Learn Tool, SmartKey is secure against any unauthorized re-keying. This protective feature ensures that builders and property managers are not at risk of losing control of property access.

Delivering a high level of protection, SmartKey 980 deadbolts feature the Builders' Hardware Manufacturers Association (BHMA) ANSI Grade 1 rating for improved drilling attack resistance and have passed the most strin-

gent lock-picking standard, UL 437, par. 11.6. In addition, SmartKey offers BumpGuard™ technology to protect against lock-bumping attacks. The additional security provided by SmartKey, coupled with its state-of-the-art re-key technology, provides the perfect door hardware solution for multifamily housing.

### **For More information**

Kwikset SmartKey is offered in a wide array of styles and finishes in handle-sets, levers, knobs and deadbolts to match any décor. For more information about SmartKey and Kwikset, visit [www.kwikset.com/SmartKey](http://www.kwikset.com/SmartKey) or call 1-800-327-LOCK (5625).
