Kwikset

CATEGORY: Lockset/Hardware

Kwikset®, a division of Black & Decker Hardware and Home Improvement Group, has recently been recognized by *Multi-Housing News* magazine as a Product Choice Award Winner in the lockset and hardware category. This honor is a testament to Kwikset's strong commitment to bringing door hardware innovation and technology to the multifamily housing market.

New SmartKey™ Features
Advanced Re-Key Technology for Increased Convenience and Control
 SmartKey's groundbreaking lock technology provides multifamily contractors, remodelers and building managers with the ability to re-key the lock in less than 30 seconds without

removing it from the door, eliminating the hassle and cost of replacing the lock. With SmartKey, in three simple steps, a potentially compromised or outdated key can be replaced with a new, secure key.

SmartKey's Patented Side Locking Bar Technology Provides Superior Security

SmartKey brings a higher level of security to residential door hardware through its patented side locking-bar technology. Because SmartKey eliminates the typical sheer line found in traditional pin and tumbler locks, SmartKey locks are both bump- and pick-resistant. By using the included proprietary SmartKey Learn Tool and

the existing functioning key, builders and property managers can safely and easily change or swap-out keys. By requiring both the functioning key and the Learn Tool, SmartKey is secure against any unauthorized re-keying. This protective feature ensures that builders and property managers are not at risk of losing control of property access.

Delivering a high level of protection, SmartKey 980 deadbolts feature the Builders' Hardware Manufacturers Association (BHMA) ANSI Grade 1 rating for improved drilling attack resistance and have passed the most stringent lock-picking standard, UL 437, par. 11.6. In addition, SmartKey

offers BumpGuard™ technology to protect against lock-bumping attacks. The additional security provided by SmartKey, coupled with its state-of-the-art re-key technology, provides the perfect door hardware solution for multifamily housing.

For More information

Kwikset SmartKey is offered in a wide array of styles and finishes in handle-sets, levers, knobs and deadbolts to match any décor. For more information about SmartKey and Kwikset, visit www.kwikset.com/SmartKey or call 1-800-327-LOCK (5625).

Simply Re-key

The lock you can re-key in under 30 seconds without removing it from the door.

Increase efficiency & security

- Eliminate the costs and hassle of rekeying
- Improve key control

Superior Security For Homeowners

BumpGuard™ protects against lock bumping* ensuring tenant's peace of mind.

*Lock bumping - an attack technique using specially cut keys that can defeat conventional pin and tumbler locks.
